2. BIOGRAPHY

Dr. Damon Andrew serves as Dean and Professor of the College of Education at his alma mater, Florida State University. Founded in 1851, Florida State University is a sea- and space-grant university with over 42,000 students, and it is the oldest preeminent research university in Florida. It is one of only 40 public universities worldwide to hold both the Carnegie Highest Research Activity Doctoral University and Community Engagement classifications, and the university is ranked #19 by *U.S. News & World Report (USNWR)* among public doctoral universities. Established in 1905, the College of Education is the oldest in Florida and includes the Department of Educational Leadership & Policy Studies, Department of Educational Psychology & Learning Systems, Department of Sport Management, School of Teacher Education, and two laboratory schools (Florida State University School and Pembroke Pines Charter School). The College of Education serves over 2,300 students via 113 full-time faculty, 45 full-time staff, and an operational budget of \$40M.

Since his return to FSU in 2018, the College of Education (COE) has advanced to the #18 *USNWR* ranking among public universities, the best ranking in its history. COE's Higher Education (10), Curriculum & Instruction (15), Special Education (18), Educational Psychology (17), Instructional Systems and Learning Technologies (1), and Sport Management (1) programs have also ascended to new ranking heights among public universities. New academic programs have been launched in Autism Spectrum Disorder (graduate certificate), College Teaching (graduate certificate), Educational Leadership & Administration (Ed.D.), Learning Design & Performance Technology (Ed.D.), School Counseling (M.S./Ed.S.), and Teaching English to Speakers of Other Languages (TESOL; online M.S.), and a new interdisciplinary center for athletic coaching, FSU-COACH, was established that offers both a master's degree and graduate certificate in Athletic Coaching. In addition, combined bachelor's/masters programs in Elementary Education, English Education, Social Science Education, Special Education, Visual Disabilities Education, and Sport Management have been established. Further, a new initiative named Project ElevatED was launched to support key influencers in the lives of Pre-K-12 students, including teachers, school counselors, school psychologists, principals, superintendents, coaches, athletic directors, and other professionals. Renovations to the TeachLive Lab Space, Office of Research Suite, Tully Gym Mat Room, Office of Academic Services and Intern Support, and the Department of Educational Psychology and Learning Systems have been completed, and a new \$17M STEAM building has been

constructed on the campus of Florida State University School, COE's K-12 laboratory school in Tallahassee.

From 2013-2018, Dr. Andrew served as the inaugural permanent Dean and E.B. "Ted" Robert Endowed Professor of the College of Human Sciences and Education at Louisiana State University. Founded in 1860, Louisiana State University is a land-, sea-, and space-grant university and the flagship institution of Louisiana that enrolls over 31,000 students on the Baton Rouge campus. It is one of only 40 public universities worldwide to hold both the Carnegie Highest Research Activity Doctoral University and Community Engagement classifications. Formed in 2012, the College of Human Sciences and Education (CHSE) includes the School of Education, School of Kinesiology, School of Leadership & Human Resource Development, School of Library & Information Science, School of Social Work, the University Laboratory School (K-12), and the LSU Early Childhood Education Laboratory Preschool. In addition, the CHSE is the home of the Leadership Development Institute, Life Cycle and Aging Center, and the Social Research and Evaluation Center. Significant capital outlay projects included the construction of Cypress Hall, the acquisition and subsequent renovation of the LSU Early Childhood Education Laboratory Preschool facility and the renovation of the Huey P. Long Field House, Gym/Armory Building, Coates Hall, and Peabody Hall. The CHSE serves over 5,800 students via 250+ full-time faculty, 100+ full-time staff, and an operational budget of \$35M.

During his time at LSU, Dr. Andrew led the College of Human Sciences and Education to new heights. The CHSE recorded increases in student majors (10.6%), credit hour productivity (11.4%), student retention (3.8%), new faculty lines (15 new full-time lines), faculty diversity (3.3%), continuing education revenue (175%), grant/contract funding (156%) and annual fundraising (221.5%). Three new Board of Regents-approved research centers were launched in CHSE, including the Leadership Development Institute, the Life Course and Aging Center, and the Social Research and Evaluation Center. Moreover, new online graduate programs were launched in four different schools as well as 7 new certificate programs. The CHSE's Child Development Laboratory was merged with LSU's Child Care Center to establish a new national model Early Childhood Education Laboratory Preschool in the CHSE that serves 175 children via an innovative Reggio Emilia inspired curriculum. New international partnerships were established in Australia, Chile, England, New Zealand, Scotland, and South Korea; new faculty support initiatives, including the Auxiliary Faculty Research & Travel Grant Program, Internationalization Support Fund Program, and the New Faculty Success Program, were established to support the College's mission to enhance quality of life across the lifespan. From a resource perspective, the CHSE established and implemented the most successful posthumous memorial campaign in its history (Joe Dean, Sr., Memorial Campaign), and its primary facility need, the Huey P. Long Field House Renovation, was navigated from #12 on the LSU priority list to #1 at the University level and the #6 overall priority in Louisiana. A new Office of Professional Education in the College was established to support a significant increase in outreach programming.

In addition to his work with the CHSE, Dr. Andrew provided leadership at the University level for a number of key initiatives, including service as Chair of LSU's Consortium on Civic Engagement. This group developed and submitted LSU's successful reapplication for the Carnegie Classification of Institutions of Higher Education Elective Classification on Community Engagement, thus ensuring LSU remained among only 40 public universities to earn both the top-tier research classification and the community engagement classification from the Carnegie Foundation. He also was selected to represent all Deans on the University's Tenure and Promotion Policy Revision Committee, which completed revisions to the University-wide policy in 2017. Moreover, Dr. Andrew was appointed to chair the Transforming Education sub-committee for the University-wide strategic plan that was launched in September of 2017. In addition, he chaired two successful searches for the LSU Honors College Dean and LSU Online Director, and he also chaired an ad hoc Dean's Online Education Advisory Group that proposed enhancements to online education at LSU.

From 2008-2013, Dr. Andrew served as Dean and Professor of the College of Health and Human Services at Troy University. Founded in 1887, Troy University is a comprehensive regional university and SACS Level V doctoral-granting institution that enrolls over 30,000 students across four campuses in Alabama and 60 campus sites outside of the state and around the world in 12 countries. Known as Alabama's International University, Troy University (TROY) was ranked #28 among public regional universities in the South by *U.S. News & World Report*, the best university in Alabama by *Forbes Magazine*, and the 25th best university in the United States for international students by the *Institute for International Education* during Dr. Andrew's time there, and it was the fastest growing (+8,473) institution in its classification according to *The Chronicle of Higher Education*. In its inaugural ranking of online programs, the *U.S. News & World Report* ranked TROY #3 in student engagement and assessment and #5 in student services and technology nationally among all universities, public and private. Formed in 1994, the College of Health and Human Services (CHHS) in 2013 included the Department of Athletic Training, Department of Human Services, Rehabilitation, and Social Work, Department of Kinesiology and Health Promotion, School of Hospitality, Sport, and Tourism Management, and the School of Nursing, as well as the Bureau of Research, Evaluation, Administration, and Development. The School of Hospitality, Sport, and Tourism Management was conceived, approved, and staffed under Dr. Andrew's leadership. In 2013, the CHHS served over 3,000 students via 75 full-time faculty, 58 full-time staff, and an operational budget of \$16M, and educational, health, and human science-related programs were offered at the Associate's, Bachelor's, Master's, and Doctoral levels on all four Alabama campuses (Troy, Dothan, Montgomery, and Phenix City), sites in Columbus (GA), Atlanta (GA), Orlando (FL), and San Antonio (TX), as well as online.

Dr. Andrew's tenure in the CHHS was marked by significant increases in College enrollment (33%), new faculty lines (27), research activity (167% increase in peer-reviewed publications), and external funding (approximately \$7 million annually). Further, new academic programs were developed, and existing programs were expanded to serve students on other campuses, prompting his oversight of eight new construction/renovation projects within the College on all four Alabama campuses. Among these new academic programs was TROY's first doctoral program, the Doctor of Nursing Practice, and TROY's first PhD program in Sport Management, which prompted the need for a level change with the Southern Association of Colleges and Schools (SACS) for reclassification as a doctoral-granting institution. Dr. Andrew served as the sole author of TROY's level change submission to SACS that resulted in formal recognition of TROY as a doctoral-granting institution (Level V). In addition, he launched the International Center for Hospitality, Sport, and Tourism, significantly expanded the Bureau of Research, Evaluation, Administration and Development (BREAD), and played a significant role on the SACS Leadership Team that secured the University's ten-year reaffirmation.

From 2006-2008, Dr. Andrew served as Doctoral Program Founder/Director and Associate Professor at the University of Tennessee. Founded in 1794, the University of Tennessee (UT) is a sun- and land-grant university and the flagship institution of Tennessee that enrolls over 28,000 students on the Knoxville campus. It is one of only 40 public universities worldwide to hold both the Carnegie Highest Research Activity Doctoral University and Community Engagement classifications. As part of his proposal to initiate a new Sport Management concentration within the existing Ph.D. program in Sport Studies, Dr. Andrew conducted an environmental analysis of competing Sport Management doctoral programs, provided justification for the initiation of a new program at UT, developed and proposed a comprehensive curriculum for the program, and proposed and negotiated a resource plan to support the program. The doctoral program admitted its first students in 2007 and has quickly risen to prominence among the elite sport management doctoral programs in the world.

Prior to his service at UT, Dr. Andrew served as Doctoral Program Director and Assistant Professor at the University of Louisville from 2004-2006. Founded in 1798, the University of Louisville is a preeminent

metropolitan research university that enrolls over 22,000 students. It is classified by Carnegie as a Highest Research Activity Doctoral University. As Doctoral Program Director, Dr. Andrew revitalized the curriculum of the program to include four new specialized doctoral seminars and implemented a comprehensive mentorship program for all doctoral students, featuring an annual evaluation of scholarly activities. These program enhancements helped grow the program from 12 to 22 students over two years, despite decreases in funding for graduate assistantships.

While serving as a higher education administrator, Dr. Andrew has also been called upon to serve in leadership roles for a number of learned societies. From 2013-2017, he served on the Board of Directors of the *American Association of University Administrators* (AAUA) as Vice-Chair, Chairperson-Elect, Chairperson, and Immediate Past-Chairperson, and, in 2017, he was elected to fulfill the term of a departing Chairperson-elect, which included terms as Chairperson in 2017-18 and Immediate Past-Chairperson in 2018-19. Founded in 1970, the AAUA is the premier national association for university administrators, and the organization develops and advances superior standards for the profession of higher education administration via its policy statements, programs, and services. In addition, Dr. Andrew has served in leadership capacities for his profession on numerous occasions. He is presently serving a three year term as President-Elect, President, and Past-President of the *North American Society for Sport Management*, where he also served as Member-at-Large from 2008-2010. He also served as Executive Director of the *Applied Sport Management Association* from 2013-2018 and as Financial Officer of the *Sport and Recreation Law Association* from 2010-2012.

Overall, Dr. Andrew's administrative accomplishments have been recognized by a number of national awards. For example, the *American Association of University Administrators* has recognized his leadership twice via the Robert W. MacVittie Emerging Leader Award in 2011 and the William C. McInness and Edmund G. Ryan Award for Mid-Career Higher Education Leadership in 2017. In addition, his discipline has also recognized his administrative accomplishments via the *Commission on Sport Management Accreditation* Hall of Fame Distinguished Administrator Award in 2021, *Society of Health and Physical Educators* Sport Professional of the Year Award in 2014 and the *National Association for Kinesiology in Higher Education* Distinguished Administrator Award in 2012.

As a scholar, Dr. Andrew's areas of research span organizational behavior, human resource management, and consumer behavior, and his specific research interests include: (1) leadership in sport, (2) the attraction of sport to participants, spectators, sponsors, employees, and stakeholders, and (3) the effective integration of individuals with disabilities into the sporting environment. To date, his research products include a research methods textbook (now in its second edition), 30 funded grants and contracts (over \$2.54M funded), 183 peer-reviewed articles, reviews, proceedings, and book chapters, and 120 presentations at national and international conferences. He is currently the Senior Editor of the *Journal of Higher Education Management* and Associate Editor of the *International Journal of Sport Management and Marketing*, having previously served as the Editor of the *Sport Management Education Journal* and the *Journal of Applied Sport Management*. Dr. Andrew is the only sport management scholar to ever be elected as Fellow of both the *National Academy of Kinesiology* and the *National Association for Kinesiology in Higher Education*. He also received the *Southern District Society of Health and Physical Educators* Scholar Award in 2015, the *National Association for Kinesiology in Higher Education* Distinguished Scholar Award in 2017, and the *Applied Sport Management Association* Scholar Lifetime Achievement Award in 2018.

Dr. Andrew earned an associate's degree from Coastal Alabama Community College, a bachelor's degree in Physical Education and a master's degree in Exercise Physiology from the University of South Alabama, two additional master's degrees in Biomechanics and Sport Management from the University of Florida, and a Ph.D. in Sport Administration from Florida State University. In addition, he completed three post-graduate certificates in higher education administration from Harvard University and

Vanderbilt University. He has received distinguished alumnus awards from the University of South Alabama, University of Florida, and Florida State University.

6. RESEARCH INTERESTS AND OVERVIEW

My general areas of research span organizational behavior, human resource management, and consumer behavior, and much of my research has centered around the antecedents of critical organizational outcomes, such as employee satisfaction, motivation, and commitment, and the importance of consumer motivations to the provision of consumer-based services. My specific research interests can generally be classified into three areas: (1) leadership in sport, (2) the attraction of sport to participants, spectators, sponsors, employees, and stakeholders, and (3) the effective integration of individuals with disabilities into the sporting environment. Populations studied include United States National Governing Body Presidents and Executive Directors; NBA, PGA/LPGA, and NCAA athletic department employees and volunteers; MLB, NCAA, mixed martial arts, minor league baseball, and minor league ice hockey spectators; recreational, collegiate, elite, and international athletes and coaches; sport participants with disabilities; parents of summer collegiate basketball camp participants; sport and entertainment venue managers; college physical activity program participants; high school sports officials; first-year college students; and sport management faculty.

Invited Guest Editor:

- [*Journal of Global Sport Management*](#): Special Issue on “The Unique Context of Sport” 2017-19 (appointed)
 - *A premise for the establishment of specialized sport management education programs is the uniqueness of the sport industry. Common notions to support this claim include the simultaneous nature of sport production and consumption, the perishable nature of the sport product, and the inability to guarantee consumer satisfaction with an unpredictable outcome. Such aspects also extend into professional sport enterprise where the largest sources of revenue can emanate from extraneous sources (e.g., media rights) as opposed to ticket sales, and even sport industry career paths, which are not as well defined as other industries. However, as the field of sport management has evolved, challenges have been raised concerning the uniqueness of sport management education content and research (Slack, 1998). Accordingly, this special issue welcomes submissions that highlight or even demonstrate the uniqueness of the sport context.*
- [*International Journal of Sport Management and Marketing*](#): Special Issue on “The Attraction of Sport” (volume 4, issue 4) 2006-2007 (appointed)
 - *Few would deny that one of the primary factors responsible for sport's rapid industrial growth is its attraction to participants, spectators, sponsors, employees, and stakeholders. Sport's attraction to participants is evidenced by over \$89 billion of sporting goods purchases in 2005. Sport marketing scholars have explored sport's attraction to spectators both theoretically and empirically. Additional streams of research have developed concerning sponsor attraction to sport, including the fit between a sponsor's brand and the associated sporting event. Organisational behaviour research has investigated several psychological constructs related to employee attraction to sport such as perceived organisational prestige and organisational commitment. Research has*

also targeted the economic and non-economic impact of sport that influences its attractiveness to stakeholders. Therefore, the aim of this special issue is to devote further attention to the attraction of sport to all associated entities.
