Mixed Methods Inquiry: Innovations in Technology

Dr. Michelle Salmona
Institute for Mixed Methods Research

Dr. Dan Kaczynski
Central Michigan University

Friday
September 9
12:00 – 1:15 pm
G154 STB

Researchers are increasingly adopting the use of research and evaluation data analysis software (REDAS) for both qualitative and mixed methods studies. This seminar will discuss the impact of new developments in technology and the use of Dedoose cloud-based data analysis software. Dedoose is a cross-platform cloud-based mixed-methods application that facilitates the coding and analysis of qualitative and mixed methods data and their integration with demographic and other quantitative data. Collaboration is one of the key drivers behind the development of Dedoose, allowing project owners to provide others with access to their projects, facilitating real-time online team engagement. Participants are invited to bring a laptop to follow along during the hands-on portion of the seminar, and may find it helpful to review the Dedoose training tutorials prior to the workshop available at http://www.dedoose.com/. Free for one month with nothing to install and setup is instant – sign up at www.dedoose.com

Michelle Salmona is President of the Institute for Mixed Methods Research (IMMR) and an Adjunct Associate Professor at the University of Canberra. With a background as a project management professional and a senior fellow of the Higher Education Academy, UK, Michelle is a specialist in research design and methods.

Dan Kaczynski is a Professor of Educational Leadership at Central Michigan University and an Adjunct Professor at the University of Canberra, Australia. Dan is a Senior Research Fellow at the Institute for Mixed Methods Research.
